Glossary of Tables	20

1. Terms and Conditions

This document (the "QUID Catalog") defines the Terms and Conditions under which Quividi products and services are provided to its Customers.

1.1. Agreement

By submitting a Compliant Customer Order, you are accepting the Terms and Conditions described in the QUID Catalog.

1.1.1. Compliant Customer Order

A Purchase Order ("PO") or Duly Signed Quote ("DSQ"), collectively known as an "Customer Order", needs to contain the following to be accepted and processed by Quividi:

- Quote Number or PO Number
- Customer name and address (billing and shipping if different)
- Date (Creation)
- Valid Product Codes, quantities, subtotals and totals
- VAT ID if part of the European Union
- If it is a Quote, it must be signed

If these requirements are meant, the Customer Order is considered a Compliant Customer Order.

1.1.2. Related Agreement and Terms

By submitting a Customer Order, you are indicating you accept and agree to the Terms and Conditions described in the related agreements:

- End User License Agreement ("EULA")
- Support Terms of Service ("Support TOS")
- API Terms of Service ("API TOS")

The latest versions of these agreements are located at <http://www.quividi.com/terms-of-use/>.

1.2. License

Quividi Software is licensed according to the EULA.

This document uses the following terms defined in the EULA:

- "Customer" (you),
- "Entitlement" (this document and its contents),
- "Network",

- "Authorized Users",
- "Licensed Units",
- "Managed Device",
- "Software"

The Terms and Conditions of the license, also known as its Aspects, are defined in this section.

1.2.1. License Term

The License Term is the schedule under which the License is in effect for the licensed Software. The following License Term durations are used by Quividi:

- 1 year
- 3 years
- 5 years
- 1 week
- Perpetual

The License Term depends on the Software that is being licensed. See the QUID Catalog sections on those Products and Services for more details.

1.2.1.1. License Start

The License Start Date ("License Start") is the date the Software and Separately Licensable Features are activated.

1.2.1.2. License End

The License End Date ("License End"), also known as the License Expiry, is the date the Software and Separately Licensable Features are no longer active.

In the case of a Perpetual License Term, the License has no License End.

1.2.2. License Unit

The Licensed Unit is the subject of the license. The following Licensed Units are used by Quividi:

- Software Instance: described in this document as "Per Camera" since a Software Instance can only process video from 1 camera at a time.
- Login: uniquely identified by email address and paired with a secret password for secure authentication with Quividi, should not be shared for operational security reasons.
- Seat: also known as "Per Individual", is for a named person, identified by a unique email address, and cannot be shared between multiple people.

The Licensed Unit depends on the Software that is being licensed. See the corresponding QUID Catalog sections for more details.

1.2.3. License Types

The License may have usage restrictions and allowances. The following License Types, also known as License Usages, may be prescribed:

- Commercial License: commercial usage is permitted with a Commercial License. For example, it may be used in retail digital signage, smart vending or digital out-of-home advertising. Unless otherwise specified, a License is Commercial by default.
- Testing License: No commercial usage is permitted with the Testing-Only License. It exists for API development and quality assurance purposes. For example, a showroom or network operations center requires a Commercial License.
- Fixed Location License: The License is for a Fixed Location, also known as “Fixed”. Moving the unit to a new Location requires a new License.
- Roaming Location License: The License is not restricted to a Fixed Location, also known as “Roaming”. Moving the unit to a new Location does not require a new License.

1.2.4. License Renewal

On the License End Date, the Software License Renewal is either:

- Automatic: happens without Customer intervention
- Manual: happens only with Customer intervention.

Unless otherwise specified, a Software License Renewal is Manual.

1.2.4.1. License Renewal Term

If set to Automatically Renew, the additional License Term is specified.

1.2.5. Software Downloads

The License also specifies for which operating systems the Software Download is available.

1.3. Software Support

Software Support services are provided according to the Support TOS.

1.3.1. Support Term

Unless otherwise specified, the Support Term matches the License Term.

1.3.1.1. Support Start

The Support Start Date (“Support Start”) is the date Support becomes active for its corresponding License.

1.3.1.2. Support End

The Support End Date (“Support End”), also known as the Support Expiry, is the date Support is no longer available for the corresponding License.

1.4. Data API

Data APIs are provided according to the API TOS.

There are two classes of APIs:

- VidiCenter API: also known as Cloud API
- VidiReports API: also known as Local API which has two variants:
 - Local Logs
 - Real-Time API

Each of the Data APIs is considered a Separately Licensable Feature. See the corresponding QUID Catalog sections for more details.

1.4.1. API Term

Unless otherwise specified, the API Term matches the License Term.

1.4.1.1. API Start

The API Start Date (“API Start”) is the date the API becomes active for its corresponding License.

1.4.1.2. API End

The API End Date (“API End”), also known as the API Expiry, is the date the API is no longer available for the corresponding License.

2. Quividi Interchangeable Denomination (QUID)

To activate Quividi products and services, a Customer must first buy an intermediary unit called a QUID (plural "QUIDs"). A Customer's QUID unit price goes down the more QUID volume they purchase. This means Quividi products and services cost less the more they are used.

The QUID Catalog describes how QUIDs can be ordered and the variety of ways a Customer can use them to Activate Quividi products and services.

2.1. General Terms

This section describes the basic mechanics of the QUID system and the Terms and Conditions that apply on Customer Orders by default.

TABLE 1: QUID GENERAL TERMS PRODUCT CODES

Code	Name	Description	Cost
QUID	QUID General Terms	QUIDs expire immediately and must be used in the same purchase transaction.	Available separately.

2.1.1. QUID Tiers

A QUID Tier is a volume-based tiered price. It has predictable price breaks at predictable volume breaks.

2.1.1.1. Starting Volume

The threshold at which a new QUID Tier begins is its "Starting Volume".

The QUID Tier is typically identified by its Starting Volume, e.g." QUID Tier 25".

2.1.1.2. Unit Price

Each QUID Tier has a corresponding Unit Price, also known as a QUID Price, which is the per-QUID price Customers that qualify for that QUID Tier are entitled to pay.

The QUID Tiers Unit Prices are available separately. Speak to your Quividi Representative for more details.

2.1.1.3. Starting Price

The Starting Price is the minimum cost to access a QUID Tier. It is equal to its Starting Volume multiplied by its Unit Price.

2.1.1.4. Next Volume

A QUID Tier's Next Volume is the Starting Volume of the next QUID Tier.

2.1.2. QUID Level

A Customer's QUID Level is the QUID Tier with the highest Starting Volume that is lesser than or equal to the amount of QUID in the Customer Order.

This QUID Tier will also be the one with the lowest Unit Price.

2.1.3. QUID Balance

The QUID Balance is the QUID Order Amount from the QUID Order subtracted by the Activation Amount from the QUID Activation.

2.1.3.1. QUID Expiry

Under General Terms, QUIDs expire and are not usable outside the Customer Order in which they are ordered. It is therefore necessary to use the QUIDs to Activate Products and Services in the same transaction.

2.1.3.2. Negative QUID Balance

If the QUID Order and QUID Activation are done in the same Customer Order, it is possible the Customer will have a Negative QUID Balance until Payment is received.

A Negative QUID Balance triggers the Deactivation Schedule.

2.1.4. Product Codes

Quividi products and services are packaged into offerings and these packages are identified by a "Product Code" which is used to activate them when they are included in the Customer Order.

2.1.4.1. QUID Cost

The QUID Cost is the amount deducted from a Customer's QUID Balance when its corresponding Product Code is activated.

2.1.4.2. Product Description

A Product Description is the Software, Separately Licensable Features, License and other Terms and Conditions that are associated to a Product Code and which are Activated when that Product Code is Activated.

2.1.5. QUID Order

To Order QUIDs, submit a Compliant Customer Order containing the appropriate QUID Product Code. This is called a QUID Order.

See Appendix A for the Product Code options for Ordering QUIDs and the Terms and Conditions that accompany them.

2.1.5.1. Order Date

The date the Order is received by Quividi is the Order Date.

2.1.5.2. QUID Order Amount

The QUID Order Amount is the volume of QUIDs purchased in the Customer Order.

2.1.5.3. QUID Balance Increase

The Customer's QUID Balance increases by the QUID Order Amount the moment payment is received for the Customer Invoice.

2.1.6. QUID Activation

For a Customer to Activate Products and Services from QUIDs, a Compliant Customer Order needs the Product Codes that the Customer desires to Activate.

The moment the Customer Order is processed is called a QUID Activation.

2.1.6.1. Activation Date

The date of the QUID Activation is the Activation Date.

2.1.6.2. Activation Amount

The Activation Amount is the QUIDs necessary to activate the Quividi products and services as specified for the Product Codes and in the quantities used in the Customer Order.

2.1.6.3. QUID Balance Decrease

A Customer's QUID Balance decreases by the Activation Amount on the Activation Date.

2.1.6.4. Activation Anniversary

Every year on the same calendar date as the Activation Date is considered an Activation Anniversary.

2.1.7. Invoice and Payment

Upon processing of a Compliant Customer Order, Quividi sends a Customer Invoice.

This document indicates the balance of money owed to Quividi. Payment of that invoice triggers the QUID Balance Increase.

2.1.8. Deactivation

The Deactivation process occurs if the Customer has not paid their invoice within 30 days. All Software Licenses and Separately Licensable Features become disabled after that period.

2.1.8.2. Canceling Deactivation

Payment in full for the corresponding invoices will trigger the removal of the Customer from the Deactivation Schedule.

2.2. Annual Terms

QUIDs purchased under Annual Terms behave like QUIDs purchased under General Terms except for the differences listed in this section.

TABLE 2: QUID ANNUAL TERMS PRODUCT CODES

Code	Name	Description	Cost
QUID-1Y	QUID Annual Terms	QUIDs expire 1-year after purchase.	Available separately.

2.2.1. Schedule Duration

QUIDs in QUID Orders are active for 1 year after Order Date.

2.2.2. QUID Balance

The Customer can keep a QUID Balance of unused QUIDs from QUID Orders for a Schedule Duration (e.g. 1 year for Annual Terms) after its Order Date.

As QUIDs are used to Activate Products and Services, their Activation Cost is subtracted from the Customer's QUID Balance.

2.2.2.1. FIFO Consumption

At Activation, QUIDs are consumed from QUID Orders in a first-in, first-out (FIFO) basis. This means that Customer Orders consume QUIDs from QUID Orders that will reach QUID Expiry first before others.

2.2.3. QUID Expiry

QUID Expiry is the date that is a Schedule Duration (e.g. 1 year for Annual Terms) after Order Date. On this date:

- Any unused QUIDs from that Order are subtracted from a Customer's QUID Balance
- The QUID Order stops contributing to the Customer's QUID Volume

2.2.4. QUID Volume

QUID Orders that occurred within the Schedule Duration (i.e. have not reached QUID Expiry yet) contribute towards a cumulative value called the QUID Volume. QUID Volume is used to determine the Customer's QUID Level and QUID Price.

When used in the context of a QUID Order, the QUID Volume also includes the QUID Order Amount which may qualify the Customer to a lower-priced QUID Tier.

2.2.5. QUID Level

A Customer's QUID Level is the QUID Tier with the highest Starting Volume that is lesser than or equal to the Customer's QUID Volume.

This QUID Tier will also be the one with the lowest Unit Price.

2.3. Extended Terms

QUIDs purchased under Extended Terms behave like QUIDs purchased under Annual Terms except for the differences listed in this section.

TABLE 3: QUID EXTENDED TERMS PRODUCT CODES

Code	Name	Description	Cost
QUID-3Y	QUID Extended Terms 3Y	QUIDs expire 3-years after purchase.	Available separately.
QUID-5Y	QUID Extended Terms 5Y	QUIDs expire 5-years after purchase.	Available separately.

2.3.1. Schedule Duration

The Schedule Duration for Extended Terms is either:

- 3 Years
- 5 Years

The QUID Expiry for a QUID Order is an Extended Schedule Duration after the QUID Order Date.

2.3.2. QUID Volume

With Extended Terms, a Customer's QUID Volume is equal to the sum of the balances of all active (not expired) Customer's QUID Orders that use Extended Terms.

When used in the context of a QUID Order, the QUID Volume also includes the QUID Order Amount which may qualify the Customer to a lower-priced QUID Tier.

3. AMP Suite Offering

The AMP Suite Offering is Quividi's flagship product which uses computer vision technology to power cloud-based audience analytics and interactive digital signage experiences. Quividi AMP Suite, also known as the "Platform", is comprised of 2 Software products:

- VidiCenter: the web management and data analytics portal
- VidiReports: the audience measurement computer vision technology

This section describes the AMP Suite Offering, also known as the “Platform Offering”.

3.1. VidiCenter

VidiCenter Software provides web-based access to a network of VidiReports instances for management and data analytics.

This section describes the ways you can activate VidiCenter Software and Separately Licensable Features in the Platform Offering for a 1-year License Term.

TABLE 4: VIDICENTER MANAGEMENT AND ANALYTICS PRODUCT CODES

Code	Name	Description	Cost
AMP-VCU-1Y	AMP Suite VidiCenter User 1Y	Includes a License for 1 Login for 1 Year with Web Access and online training for any Access Level (Visitor, Analyst, Manager).	1.00 QUID

3.1.1. VidiCenter License

VidiCenter is licensed according to the EULA and with additional clarifications listed in this section.

TABLE 5: VIDICENTER LICENSE TERMS AND CONDITIONS

Aspect	Value
License Term	<ul style="list-style-type: none"> • 1 Year • 3 Years • 5 Years
License Unit	Login
License Renewal	Automatic: 1-Year

3.1.1.1. VidiCenter Access Levels (Roles)

VidiCenter caters to 3 business-driven user profiles which we call User Roles. Each Role corresponds to an equivalent Access Level in VidiCenter. Any of the User Roles means one of the 3 listed below.

TABLE 6: OPERATIONAL ROLES AND THEIR CORRESPONDING VIDICENTER LOGIN ACCESS LEVELS

User Role	Access Level
Audience Analytics	Visitor
Dashboard Designer	Analyst
Network Manager	Manager

3.1.2. VidiCenter User Roles

VidiCenter offers a modern HTML-based web portal interface for the various Roles which permits the creation, updating and viewing of records permitted with the Role's corresponding Access Level.

3.1.2.1. Audience Analytics

The Audience Analytics Role, also known as the VidiCenter Viewer Access Level, provides access to the following areas for that Login:

- Dashboard and Charts (Read-Only)

3.1.2.2. Dashboard Designer

The Dashboard Designer Role, also known as the VidiCenter User Access Level, provides access to the same areas as the Audience Analytics Role, with additional access to the following areas:

- Dashboard and Charts (Read-Write)

3.1.2.3. Network Manager

The Network Manager Role, also known as the VidiCenter Manager Access Level, provides access to the same areas as the Dashboard Designer Role, with additional access to the following areas:

- Data Organization
- License Management
- Monitoring Alerts
- Diagnostics

3.1.3. VidiCenter (Cloud) API

The VidiCenter API, also known as Cloud API, allows you to access the aggregated data of all your VidiReports instances via a secure and automated REST API.

3.1.3.1. Access

To access the Cloud API, you need a VidiCenter Logins with Manager Access Level and to request its activation.

3.1.3.2. Dependencies

VidiCenter Hosting is required to be included with the VidiReports Software License to access its data via the Cloud API.

3.1.4. VidiCenter Network

The VidiCenter Network is required to host, organize and monitor audience data, for each End-Customer.

A VidiCenter License allows for the creation of a VidiCenter Network, or for pointing audience data towards one existing VidiCenter Network.

Each VidiCenter User has access to at least one VidiCenter Network.

Code	Name	Description	Cost
AMP-VCN-1Y	VidiCenter Network 1Y	Includes the creation of a network in VidiCenter for 1 Year	1.00 QUID

3.1.5. VidiCenter Shared Webinar Training

Quividi conducts regular Role-based training using web-based webinar software. These training sessions are shared so multiple Quividi customers may be trained at the same time.

3.1.5.1. Network Manager Training

The training program is an overview of VidiCenter's functional areas as they relate to the VidiCenter Manager Access Level and the Network Manager Role.

3.2. VidiReports

VidiReports Software uses computer vision technology to perform audience measurement and power interactive content.

This section describes the ways you can activate VidiReports Software and Separately Licensable Features in the Platform Offering for a 1-year License Term.

TABLE 7: VIDIREPORTS (ANALYTICS) PRODUCT CODES

Code	Name	Description	Cost
AMP-VRP-1Y	AMP Suite VidiReports Pro 1Y	Includes a License for 1 Camera for 1 Year with Algorithms (Pro or Gates), VidiCenter Hosting and Local Logs API.	0.50 QUID
AMP-VRE-1Y	AMP Suite VidiReports Expert 1Y	Includes a License for 1 Camera for 1 Year with Expert Algorithms, VidiCenter Hosting and Local Logs API.	0.75 QUID
AMP-VRN-1Y	AMP Suite VidiReports Nano 1Y	Includes a License for 1 Camera for 1 Year with Nano Algorithms, VidiCenter Hosting and Local Logs API.	0.35 QUID
AMP-VRU-EX-1Y	AMP Suite VidiReports Upgrade to Expert 1Y	Adds Expert Algorithms for 1 Year to a VidiReports Pro License.	0.25 QUID

TABLE 8: VIDIREPORTS RT (ANALYTICS AND INTERACTIVITY) PRODUCT CODES

Code	Name	Description	Cost
AMP-VRP-RT-1Y	AMP Suite VidiReports Pro RT 1Y	Includes a License for 1 Camera for 1 Year with Pro Algorithms, VidiCenter Hosting, Real-Time API and Local Logs API.	0.75 QUID
AMP-VRE-RT-1Y	AMP Suite VidiReports Expert RT 1Y	Includes a License for 1 Camera for 1 Year with Expert Algorithms, VidiCenter Hosting, Real-Time API and Local Logs API.	1.00 QUID
AMP-VRN-RT-1Y	AMP Suite VidiReports Nano RT 1Y	Includes a License for 1 Camera for 1 Year with Nano Algorithms, VidiCenter Hosting, Real-Time API and Local Logs API.	0.60 QUID
AMP-VRU-RT-1Y	AMP Suite VidiReports Upgrade to Real-Time 1Y	Adds Real-Time API for 1 Year to a VidiReports License.	0.25 QUID

3.2.1. VidiReports License

VidiReports is licensed according to the EULA and with additional clarifications listed in this section.

TABLE 9: VIDIREPORTS LICENSE TERMS AND CONDITIONS

Aspect	Value
License Term	<ul style="list-style-type: none"> • 1 Year • 3 Years • 5 Years
License Unit	Per Camera
License Type	<ul style="list-style-type: none"> • Commercial License • Fixed Location
Renew	Automatic
Downloads	<ul style="list-style-type: none"> • Windows • Linux x86 • Linux ARM (Only with Nano Algorithms)

3.2.2. VidiReports Data Options

VidiReports audience data is available via multiple Data Options, and each are Separately Licensable Features described in this section.

3.2.2.1. Local Logs API

VidiReports Local API, a Data API, can provide Local Logs API which provides audience data in a log format as a Separately Licensable Feature.

It is available via two methods:

- “Final Events” mode of VidiReports API
- CSV Export (upon request)

These can be used to tabulate audience counts locally but the update frequency is not sufficient to power an interactive campaign.

[3.2.2.2. VidiCenter Hosting](#)

VidiCenter Hosting enables data collection in VidiCenter for the corresponding VidiReports Software License. This data is accessible via two methods:

- VidiCenter Web Access
- VidiCenter Cloud API (upon request)

VidiCenter Hosting is always included with the yearly VidiReports License under the Platform Offering.

[3.2.2.3. Real-Time API](#)

VidiReports Local API has a mode called “Periodic” which provides high frequency audience updates that can be used to make digital signage content interactive. This variant of the Local API is known as the Real-Time API.

All “VidiReports RT” variants include the Real-Time API.

[3.2.2.4. Audience-Per-Content Hosting](#)

Storing searchable meta-data related to per content audience reports is a Separately Licensable Feature included in VidiCenter Hosting.

[3.2.3. VidiReports Algorithms](#)

The Base Software allows for the selection of one of multiple computer vision detection modes. We call these modes Algorithms and they are listed in this section as Separately Licensable Features.

[3.2.3.1. Pro Algorithms](#)

The Pro Algorithms come with basic audience metrics:

- Sex: male, female, person
- Age class: child, young, adult, senior
- Dwell time
- Attention time
- Watchers
- OTS (Opportunity-to-see)

The Real-Time API has additional metrics on the Watcher as well:

- Position
- Distance (and approach trigger)

3.2.3.2. Expert Algorithms

The Expert Algorithms come with the same metrics as Pro and an additional exclusive set:

- Absolute age
- Mood (happy ... unhappy)
- Glasses (sunglasses)
- Facial hair (moustache and beard)

The Real-Time API has additional metrics on the Watcher as well:

- Smile and frown triggers

3.2.3.3. Nano Algorithms

The Nano Algorithms are the same as the Pro algorithms, except the maximum video resolution it can process is 320x240 pixels.

3.2.3.4. Gates Algorithms

The Gates Algorithms, also known as “VidiGates Mode”, measures foot traffic using a camera in an overhead configuration. The mode is not available for selection by default and can be activated via a request to Quividi support channels.

3.3. Multi-Year

The AMP Suite is also available on with the following multi-year License Terms:

- 3 Years
- 5 Years

QUID Costs for multi-year License Terms are the QUID Cost for 1-Year multiplied by the number of years of the License Term. For example, 1 QUID for 1 year is 3 QUIDs for 3 years and 5 QUIDs for 5 years.

3.3.1. License Term of 3-Years

The following Product Codes are the entire AMP Suite Offering with a 3-year License Term.

TABLE 10: AMP SUITE PRODUCT CODES WITH A 3-YEAR LICENSE TERM.

Code	Name	Description	Cost
AMP-VCM-3Y	AMP Suite VidiCenter Manager 3Y	Includes a License for 1 Login for 3 Years with Web Access, Cloud API Access and Shared Webinar Training for any User Role.	3.00 QUID

AMP-VRP-3Y	AMP Suite VidiReports Pro 3Y	Includes a License for 1 Camera for 3 Years with Algorithms (Pro or Gates), VidiCenter Hosting and Local Logs API.	1.5 QUID
AMP-VRE-3Y	AMP Suite VidiReports Expert 3Y	Includes a License for 1 Camera for 3 Years with Expert Algorithms, VidiCenter Hosting and Local Logs API.	2.25 QUID
AMP-VRN-3Y	AMP Suite VidiReports Nano 3Y	Includes a License for 1 Camera for 3 Years with Nano Algorithms, VidiCenter Hosting and Local Logs API.	1.05 QUID
AMP-VRU-EX-3Y	AMP Suite VidiReports Upgrade to Expert 3Y	Adds Expert Algorithms for 3 Years to a VidiReports Pro License.	0.75 QUID
AMP-VRP-RT-3Y	AMP Suite VidiReports Pro RT 3Y	Includes a License for 1 Camera for 3 Years with Pro Algorithms, VidiCenter Hosting, Real-Time API and Local Logs API.	2.25 QUID
AMP-VRE-RT-3Y	AMP Suite VidiReports Expert RT 3Y	Includes a License for 1 Camera for 3 Years with Expert Algorithms, VidiCenter Hosting, Real-Time API and Local Logs API.	3.00 QUID
AMP-VRN-RT-3Y	AMP Suite VidiReports Nano RT 3Y	Includes a License for 1 Camera for 3 Years with Nano Algorithms, VidiCenter Hosting, Real-Time API and Local Logs API.	1.80 QUID
AMP-VRU-RT-3Y	AMP Suite VidiReports Upgrade to Real-Time 3Y	Adds Real-Time API for 3 Years to a VidiReports License.	0.75 QUID

3.4.2. License Term of 5-Years

The following Product Codes are the entire AMP Suite Offering with a 5-year License Term.

TABLE 11: AMP SUITE PRODUCT CODES WITH A 5-YEAR LICENSE TERM

Code	Name	Description	Cost
AMP-VCM-5Y	AMP Suite VidiCenter Manager 5Y	Includes a License for 1 Login for 5 Years with Web Access, Cloud API Access and Shared Webinar Training for any User Role.	5.00 QUID
AMP-VRP-5Y	AMP Suite VidiReports Pro 5Y	Includes a License for 1 Camera for 5 Years with Algorithms (Pro or Gates), VidiCenter Hosting and Local Logs API.	2.50 QUID
AMP-VRE-5Y	AMP Suite VidiReports Expert 5Y	Includes a License for 1 Camera for 5 Years with Expert Algorithms, VidiCenter Hosting and Local Logs API.	3.75 QUID
AMP-VRN-5Y	AMP Suite VidiReports Nano 5Y	Includes a License for 1 Camera for 5 Years with Nano Algorithms, VidiCenter Hosting and Local Logs API.	1.75 QUID
AMP-VRU-EX-5Y	AMP Suite VidiReports Upgrade to Expert 5Y	Adds Expert Algorithms for 5 Years to a VidiReports Pro License.	1.25 QUID
AMP-VRP-RT-5Y	AMP Suite VidiReports Pro RT 5Y	Includes a License for 1 Camera for 5 Years with Pro Algorithms, VidiCenter Hosting, Real-Time API and Local Logs API.	3.75 QUID

AMP-VRE-RT-5Y	AMP Suite VidiReports Expert RT 5Y	Includes a License for 1 Camera for 5 Years with Expert Algorithms, VidiCenter Hosting, Real-Time API and Local Logs API.	5.00 QUID
AMP-VRN-RT-5Y	AMP Suite VidiReports Nano RT 5Y	Includes a License for 1 Camera for 5 Years with Nano Algorithms, VidiCenter Hosting, Real-Time API and Local Logs API.	3.00 QUID
AMP-VRU-RT-5Y	AMP Suite VidiReports Upgrade to Real-Time 5Y	Adds Real-Time API for 5 Years to a VidiReports License.	1.25 QUID
